

ANJANA B

Alappuzha, Kerala | +91-7025311476 | anjanareghu202338@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Computer Science Engineering graduate (CGPA 9.03) and IEEE-published researcher with hands-on experience building AI/ML and Generative AI products in Python. Practical strength in LLM integration, RAG pipelines, and applied deep learning, with backend development experience in FastAPI and Flask. Seeking an internship to contribute to real-world AI/ML and software product development.

EDUCATION

B.Tech in Computer Science and Engineering 2022 – 2026
Sree Buddha College of Engineering, Kerala | CGPA: 9.03 / 10

Higher Secondary (Science) 2020 – 2022
RVSM HSS | Percentage: 96%

PROJECTS

StellarisAI: AI-Powered Smart Hiring System | [GitHub](#)

Python | Scikit-learn | LLaMA 3.2 | RAG | NLP | Flask — Published at IEEE ICCPCT 2025

- Integrated LLaMA 3.2 with a Retrieval-Augmented Generation (RAG) pipeline, designing and optimizing prompts for intelligent, context-aware candidate evaluation.
- Applied NLP techniques and performed data preprocessing, cleaning, and analysis on candidate datasets to improve model accuracy and reliability.
- Developed backend REST APIs in Flask supporting real-time, AI-driven recruitment workflows for automated hiring.
- Designed a modular architecture following clean-code, OOP, and separation-of-concerns principles for maintainable AI system integration.

NeuroWeave: Connectome Analysis for Neurological Recovery | [GitHub](#)

Python | PyTorch | FastAPI | Docker — Published at IEEE ICIETSD 2026

- Developed and optimized PyTorch deep learning models.
- Designed asynchronous RESTful APIs in FastAPI for secure data ingestion and concurrent model inference.
- Performed ETL preprocessing and exploratory data analysis (EDA) on neurological datasets to prepare data for modeling.
- Containerized the application with Docker for reproducible, scalable cloud deployment.

SKILLS

Languages: Python, C, SQL, Java (academic coursework)

Generative AI / LLMs: LLaMA 3.2, RAG Pipelines, Prompt Engineering, LLM Integration, NLP

AI / ML: PyTorch, Scikit-learn, TensorFlow (familiar), Keras (familiar), Deep Learning

Backend & APIs: FastAPI, Flask, Django (familiar), REST API Design, API Integration

Data Science: Pandas, NumPy, Matplotlib, Seaborn, EDA, ETL Pipelines, Data Preprocessing

Databases: PostgreSQL, MySQL, SQL, DBMS Concepts

Tools & DevOps: Docker, Git, GitHub, Linux, Agile Methodology

Core CS: DSA, OOP, Operating Systems, Computer Networks, System Design Basics

ACHIEVEMENTS & PUBLICATIONS

- Publication: “Stellaris AI: Personalized AI for Smart Hiring” — IEEE ICCPCT 2025.
DOI: 10.1109/ICCPCT65132.2025.11176675
- Publication: “ReMind: Connectome Analysis for Predicting Neurological Recovery” — IEEE ICIETSD 2026.
DOI: 10.1109/ICIETSD68684.2026.11584890
- 1st Prize — RAG Competition “AI Insight”, IEEE Student Branch SBCE
- Newsletter Editor — IEEE Student Branch, Sree Buddha College of Engineering
